Carbon Tubes Study 022514.xls

02/25/2014

Hi Raj!!! As we discussed yesterday, I spiked and extracted 5 carbon tubes at middle level and 3 carbon tubes at lower level. The recoveries for both concentrations were between 40% and 50% level. Please let me know if I have to do any further study.

Thank You

PS: I am going to return the pumps I borrowed from the Air Group.
